*Office of the Insurance Commissioner,
Capitol, Hartford, February 28, 1893.*

Sir: The Commissioner has the honor to submit herewith, as by law required, Part I of his Report, being the twenty-eighth Annual Report of this Department.

W.R. Tyler

To the Governor.

REPORT—PART I.

The first volume of the Report now submitted exhibits the condition and affairs of all companies duly authorized to make fire, marine, fidelity, or casualty insurances in this State. Abstracts of their statements of condition on December 31, 1892, and of their transactions during that year will be found herein, together with elaborate statistical tables relating to fire and marine companies and minor tabulations respecting other classes of companies.

Since Part I of last year's Report was presented, the foreign corporations named below have been admitted to transact business here, viz.:

Date.	Name and Location.	Capital in United States.	Class of Insurance.
1892.			
July 20.....	Caledonian, Edinburgh, Scotland.....	\$200,000	Fire.
October 18.....	Atlas, London, England.....	200,000	Fire.
November 21..	Eagle, New York City.....	300,000	Fire.
1893.			
February 4....	Palatine, Manchester, England.....	200,000	Fire.
	Aggregate Capital.....	\$900,000	

The following have withdrawn from the State during the year :

Date.	Name and Location.	Capital in United States.	Class of Insurance.
1892.			
March 23.....	Traders, Chicago, Ill.....	\$500,000	Fire.
April 21.....	St. Paul German, St. Paul, Minn.....	500,000	Fire.
June 7.....	Teutonia, New Orleans, La	250,000	Fire.
June 7.....	Jersey City, Jersey City, N. J.....	250,000	Fire.
December 31...	Alliance, New York City.....	200,000	Fire.
December 31...	City of London, London, Eng.....	200,000	Fire.
	Aggregate capital	\$1,900,000	

All the companies admitted, as well as those withdrawn, carried on the business of fire insurance, and the combined capital of the latter exceeds that of the former by an even million of dollars. No domestic company has been organized, and none has retired.

The whole number of companies whose affairs are exhibited in this volume is one hundred and twenty-four, being two less than last year. One hundred and thirteen are engaged in fire or fire and marine insurance ; one is exclusively marine ; two assure fidelity ; two insure against damage by boiler explosions ; one covers the risk of damage to growing tobacco by hail storms ; four are in plate-glass insurance exclusively ; and one combines plate-glass, boiler, fidelity, accident, and burglary insurance. These are the identical eleven offices appearing in last year's Report. One hundred and one are joint stock corporations and twenty-three are mutual.

FIRE INSURANCE.

Statistics of the one hundred and thirteen companies prosecuting this branch of business can be found in detail and in groups in the appendix. The following summary, taken from Table I, exhibits their general condition at the close of the year :

ASSETS, LIABILITIES, AND SURPLUS, DECEMBER, 31, 1892.

No.	Location.	Assets.	Liabilities, including Capital.	Surplus over all Liabilities.
8	Stock Cos. of Conn.....	\$32,954,124.44	\$24,927,147.82	\$8,026,976.62

113	Aggregates.....	\$214,396,159.93	\$169,309,414.94	\$45,086,744.99

The surplus of the ninety-two joint-stock offices included above is \$42,752,449.47, or eighty-nine per cent. of their capital ; and the proportion of surplus to liabilities of the twenty-one mutuals is one hundred and sixty-eight per cent. The assets of all together are one hundred and thirty-eight per cent. of the liabilities, after deducting (from the latter) capital, scrip, and special funds.

The total absolute liability for unsettled losses and other claims is \$22,809,202, the contingent liability of unearned premiums amounting to \$95,209,340.

The total amount of risks carried by these companies, on December 31, was \$16,238,743,345, a sum larger by \$1,063,-000,000 than the amount in force the year before in the one hundred and fifteen companies then reporting here.

A YEAR'S PROGRESS.

A survey of the results of the year's transactions may be made by means of a comparison with those of the previous year. This comparison will be more correct and satisfactory by taking into view only the companies operating here in both years, than it would be by comparing the one hundred and thirteen now here with the one hundred and fifteen of the year before. There are one hundred and nine such, being the same *number* as in the two years preceding, but they are not the identical companies. The summaries following relate only to the former group.

The People's Company, of Manchester, N. H., increased its capital \$150,000, and this was the only change during the year. Subsequently, in January, the New York Bowery reduced its capital from \$300,000 to \$200,000. The assets have increased about seven and one-half millions, aside from the amount paid in as capital by the People's Company.

Each of the three groups of joint stock companies shows less surplus than the year before, and the aggregate reduction is \$970,186. In 1891 the same number of offices (though not the identical offices as regards four of them) exhibited a loss of surplus, compared with the previous year, amounting to more than \$3,000,000, so that there has been an improvement in this regard of more than \$2,000,000.

The mutual companies, taken all together, have slightly increased their surplus funds ; the four of Massachusetts, however, have somewhat reduced theirs, in the aggregate, by large dividends to policyholders. The mutuals of this State return nothing to their policyholders, and hence, as to a few of them it is a pertinent question, to whom do these large surpluses belong ?

* Balance of Remittances.

† Decrement.

The dividends and reductions in surplus, taken together, show a net gain of \$4,019,574, whilst in the year before the gain was only \$669,524. This method of estimating the year's profits leaves out of consideration any change in the market value of stocks and bonds during the year,—and this change must be taken into account. The income, including the balance of remittances from abroad, exceeded the expenditure by \$4,952,707, whilst the assets increased in value \$7,480,773, besides the additional capital paid in. It is fair to conclude, therefore, that stocks and bonds were marked up from last year to the extent of the difference, viz., \$2,528,066. This sum must be deducted from the apparent profit of \$4,019,574 in order to get at the real profit of the business proper. The remainder is \$1,491,508. In 1891, instead of a gain from the business proper, computed in this way, there was a loss of \$1,585,907. The difference in the results of the two years' business, aside from the rise in value of investments, is more than three million dollars, and if the advance in values be regarded as profit, the difference becomes three hundred and seventy-five thousand dollars greater.

Fire premiums are greater than in the year before by \$10,648,395—a gain of nearly eleven per cent., and marine premiums are greater by \$557,842—a gain exceeding thirteen per cent. Interest realized has increased five and one-half per cent. The gain in total income is \$11,655,335.

*Balance received from home offices.

Whilst the premiums increased eleven per cent., the loss payments increased about fifteen, and the expenses nine. The dividends paid by companies of the United States varied in amount but little from the previous year. In the year 1891 the United States branches of the companies from foreign countries received from their home offices \$1,534,636 more than they remitted to the latter. In 1892 the balance of remittances was in the same direction, on the whole, but this balance was reduced to \$142,870.

The risks in force at the close of the year amounted to nearly sixteen thousand million dollars, having increased during the year about nine hundred millions. Over thirteen thousand millions was the sum written in 1892. The gain in amount at risk in 1891 was still greater.

The ratio of losses incurred to premiums received was fifty-seven per cent., whilst in the preceding year they were but thirty-nine per cent., and in 1890, forty-five. In 1889 the ratio was forty-four, and in 1888 fifty per centum. The amount of risks taken was \$259,164,160,—an increase of \$34,118,759.

MARINE AND INLAND INSURANCE.

Twenty-four of the one hundred and nine companies combined in the foregoing summaries transact also marine and inland navigation insurance, and one other company, the Sea, of Liverpool, is engaged wholly in this branch of business. The lake business mostly ceases before the close of the year. The amount of risks written in 1892 by these twenty-five offices was \$1,164,815,876, against \$1,013,763,502 in 1891. The premium receipts were \$7,084,003,—a gain of \$957,877 upon the premiums of the preceding year. Risks taken and premiums thereon increased about alike, to wit., fifteen and sixteen per cent. respectively. The amount of risks in force, December 31, was \$68,164,036. Losses incurred aggregated \$3,583,117,—or fifty-one per cent. of the premiums. In the year before the percentage was fifty, and in 1890 fifty-two.

CASUALTY INSURANCE.

The same eight offices as were represented here last year continue to prosecute the various branches of casualty insurance. Two insure against loss by boiler-explosions; four against loss by the breakage of plate-glass; one against both these risks, together with fidelity, personal accident, and burglary risks; and one against loss by hail of tobacco in the field. The following is a brief summary of their condition:

FIDELITY ASSURANCE.

The same three offices as before continue to prosecute fidelity assurance here. The American Surety Company increased its cash capital (in 1892) one million dollars, for which the stockholders paid one-half a million dollars (or fifty per cent.) premium. Its capital is now \$2,000,000 and surplus \$600,000.

LEGISLATION.

By law it is made the duty of the Commissioner to report to the General Assembly, from time to time, such changes as, in his opinion, should be made in the laws relating to insurance. In compliance with that statute, I have the honor to make the following recommendations:

TAXES ON FOREIGN INSURANCE COMPANIES.

Chapter XCIV of the Public Acts of 1889, which provides for the payment of taxes of foreign insurance companies, should be amended so as to extend the time for making the return to the Commissioner of the amount of premiums collected on business done in this State for the year ending December 31st. The law now requires such return to be made to the Commissioner on or before the tenth day of January, and the tax to be paid on or before the twentieth day of January. The time for making the return should be extended until January 20th, and the time in which the tax may be paid until February 1st. Sufficient time is not allowed the companies under the present law to collect the result of the year's business and report to this department. The entire system of collecting the tax on premium receipts was changed under the Act of 1889. With the modifications recommended, the law is believed to be as perfect in its machinery and effective in collection as could be desired.

REINSURANCE RESERVE ON MARINE HULLS.

Under the existing law the reinsurance reserve on all ocean marine business is computed at one hundred per cent. of premiums received on risks in force.

With the rapid mail communications which now exist, to say nothing of the cable reports from all parts of the world, which advise the insurer promptly of the arrival of vessels at different places as well as of all losses for which

they are liable, it would seem unnecessary that a reserve of one hundred per cent. should be charged on time hull risks. The reserve charged on premiums of fire insurance companies would be sufficient, fully the same proportion being earned and all losses being as promptly known.

Many of the States leading in insurance matters have within the past few years changed their basis for this computation. I would recommend that our statute be so amended as to charge a reinsurance reserve of fifty per cent. on marine time hulls.

SOLVENCY OF CASUALTY COMPANIES.

In a former report, attention was directed to the absence of positive statutory law in determining the solvency of casualty companies. This remark is equally applicable to many other forms of insurance. The only statute bearing on the subject is found in section 2925, and which is as follows: "The provisions of this title shall be applicable to all forms of insurance, and to all insurance companies, associations, corporations, partnerships, individuals, or association of individuals, doing or attempting to do business under any charter, compact, or agreement, making a guaranty, contract, or pledge of insurance, and to all chartered mutual benefit companies, so far as the nature of the business of the same may admit." Title XLVII, which includes section 2925, covers nearly all the laws relating to insurance. The last general revision of the insurance laws of the State was made under an act of the Legislature passed at the January session of 1877. The revision recommended by the commission was finally enacted into a law by the General Assembly of 1879. The commission, in making their report to the Legislature, recommended what might be termed a blanket clause to cover all classes of insurance other than life, fire, and marine. The commission, in reviewing their work, stated

that heretofore no provision had been made in our laws for the supervision of insurance companies other than those of life, fire, and marine, and they pointed out section 21 of the revision, as intended to supply this omission. Section 21 contained the following language : "The provisions of this act shall be applicable to all forms of insurance and to all insurance companies so far as the nature of the business of the same may admit." Section 21 was amended by the Legislature of 1882, and its provisions are those incorporated in section 2925 of the General Statutes.

The business of casualty as well as fidelity companies has assumed such importance as to demand a positive standard by which the solvency of such companies may be determined.

As stated in a former report, the usage has been in the case of casualty companies, to charge as liabilities in addition to capital stock, all outstanding indebtedness, and a premium reserve on policies in force equal to the unearned portion of the premiums paid by the insured, computed on the basis of fifty per cent. on yearly risks, and a part of the premiums proportionate to the unexpired time on risks written for a longer term. The Commissioner renews the recommendation made in a former report, for the passage of an act by which the premium reserve liability of casualty and fidelity companies may be determined.

DEPOSITS OF FOREIGN INSURANCE COMPANIES.

Section 2845 of the General Statutes provides :

"No foreign insurance company shall take risks in this State unless it has a cash capital of two hundred thousand dollars, and shall have made a deposit with the treasurer of this State, or with the proper officer of some other State, of not less than two hundred thousand dollars in the bonds of this State, or of the States of New York or Massachusetts, or in bonds or public stocks of the United States, in trust for the benefit of its policyholders in the United States ; and no policy issued by such company to any citizen of this State shall be invalidated by the occurrence of hostilities between the Government of the United States and the government under the laws of which it was organized."

This statute was enacted when the bonds therein enumerated were not difficult to obtain, and they commanded but little, if any, premium, and the rate of interest was satisfactory. At the present time two of the States in the list have no outstanding bonds, the third has reduced its issue by about one-half. The rapid payment of obligations by the United States has reduced that class of securities to less than half of its original issue. The demand for government bonds by trustees of estates, national banks, individuals, and corporations, who require securities easy of conversion, renders this class of bonds difficult to obtain at any satisfactory rate of interest. If the premium demanded be taken into account, together with the final loss at maturity of bond, the rate of interest realized will be less than three per cent.

The Commissioner recommends that this section of the statute be amended so as to admit of a wider range of securities which companies from foreign countries may deposit for the protection of their policyholders in the United States on entry into this State.

A bill embodying the views of this department was presented to the Legislature at its January session, 1891.

RECEIPTS AND EXPENDITURES OF THE DEPARTMENT.

The receipts of the department from June 30, 1891, to June 30, 1892, show a substantial gain. The gain over the preceding year was \$4,137.74. In the expenditures of the department, the Commissioner is unable to render an accurate statement.

The bills contracted under the head of printing and binding, law expenses, incidentals, and examination of insurance companies of the State, have not been paid in full. In the absence of specific appropriations, the Comptroller has only drawn his warrants for the payments of the sal-

aries of the clerical force of this department. For the payment of such other bills as were rendered necessary, and which could not be contracted on credit, the Commissioner made requisition on the Governor, who supplied this department with the necessary funds.

The Commissioner presents the following statement of the receipts and expenditures of the Insurance Department for the fifteen months ending September 30, 1892:
